Trellis & Fencing Installation Guide

For Square Trellis, Garden Screening, Diamond Trellis, Solid-Boarded Panels.

There are recommendations, they may vary according to the site conditions:

- Foundation Pit: Min depth 450mm / 500mm x 400mm x 400mm
- Set top of DPC [supplied] to be min 20mm above the finished ground height
- Posts set on a gravel base
- We recommend Post Crete mix to form the foundation concrete around posts

Note;

Size of foundation will vary according to ground condition , sizes assume good clay.

Also account must be taken of the exposure to the elements against trellis .

Trellis to be set min 50mm above the finished ground level.

Maintenance

At least once a year check the condition of the posts and trellis paintwork, touch up with the paint provided.
