TIMBER & CONSTRUCTION INFORMATION

All our products are constructed from joinery-grade softwood, which is FSC certified.
All posts are pressure treated to give protection against rot.

Our unique jointed construction sets our products apart from other manufacturers and creates a stronger, more durable and attractive panel than the standard framed and overlapped construction seen in other trellis products.

We use stainless steel fixings throughout our product range and all panels (excluding Slatted Screening) feature an integrated capping rail.

Orders are supplied with all necessary fixings for installing panels, post caps, finials and damp proof course to protect your posts when fixing in-ground. For painted orders a touch up pot of paint is supplied, ensuring you have everything you need to get started once you've received your delivery.
